EDUCATION

BTech Computer Science (8.67 CGPA)
SRM University
2020-2024
Specialization - Data science and artificial intelligence

Higher Secondary Education (84.6%)
Eden International School
2020 Stream - Science & Maths

Secondary Education (94.6%)
Sophia Senior Secondary School
2018

LANGUAGES

- English (full professional proficiency)
- Hindi
- Malayalam

INTERESTS

- Reading
- Music

PROFILE

Motivated graduate with willingness to learn, looking for chances to develop professionally, contribute to the industry, and obtain real-world experience. I'm eager to apply for internships and employment so that I can use my skills to their fullest potential in a work setting.

INTERNSHIPS

Front-end Developer Intern
Innovatech Technology Solutions Pvt. Ltd — Jul - Aug 2023

- Collaborating with the team to design and develop user interfaces using React.
- Implementing responsive and accessible web designs.
- Writing clean, efficient, and maintainable code.
- Assisting in debugging and troubleshooting issues.

UI/UX Intern
Rentalsify — April - May 2023

- Collaborated with the design team to create user-friendly interfaces for mobile applications.
- Assisted in the development of wireframes, mockups and prototypes.
- Conducted Usability testing to gather valuable insights.

Deloitte Virtual Experience Program
Forage — March 2023

- Gained practical insights into various facets of professional work.
- Learned skills like - Coding, looking at the data, cyber security, software development, forensic technology.

PROJECTS

PetCare Pro: A Comprehensive Web Platform With Data Insights
SRM University — Aug 2023 - May 2024

- Used machine learning algorithms to develop a state-of-the-art skin disease diagnosis model.
- Designed an all-inclusive website with a range of pet services, such as grooming and training sessions.
- Developed a user-friendly web interface with a focus on seamless PetCare Pro experiences, and applied machine learning for accurate skin disease identification.

Ovarian cancer detection project
SRM University — Feb - May 2023

- Worked on Recurrent Neural Network model for ovarian cancer detection.
- Ovarian Cancer is one of the deadliest gynecological cancers.
- Used the sequential dataset to differentiate between Ovarian TB and Ovarian cancer.

UI/UX for Ticket Check App
Coursera — Jan-Mar 2023

- Emphasizing the importance of designing with the end-user in mind to create effective interfaces.
- Gained skill in tools like Figma and Adobe XD allowing to create visually appealing and interactive prototypes.
- Learned to create wireframes, mockups and prototypes for mobile application.

Minor game projects
Self — 2022

- Worked on minor projects using python - Madlibs, Guess the number, Rock Paper Scissors, Hangman, Tic-Tac-Toe, Minesweeper, Sudoku.

CERTIFICATES

- Introduction to Data Science - Coursera
- Complete Python Bootcamp - Udemy
- Responsive Web Design - Free Code Camp
- Google UX Design(specialization) - Coursera
- Artificial Intelligence Analyst - IBM Core
- JAVA Training - Internshala
- Cloud Application Developer - IBM
- Machine Learning with R - IBM
